

ADEBANKE EUNICE PEKE

Computer Engineering Student | Aspiring AI/ML Engineer | Agentic AI Developer

Nigeria | 08139719017 | adebankepeke04@gmail.com | linkedin.com/in/adebankedev | github.com/AdebankeDev

PROFESSIONAL SUMMARY

Computer Engineering student with a **4.81/5.0 CGPA** and hands-on experience building **machine learning, LLM-powered, and agentic AI applications**. Experienced with Python, TensorFlow, Scikit-learn, LangChain, LangGraph, OpenAI Agents SDK, Streamlit, and FastAPI. Also experienced in enterprise IT infrastructure through hands-on work with Nutanix HCI, Active Directory, physical servers, troubleshooting, and system administration.

EDUCATION

Federal University Oye Ekiti (FUOYE) — B.Eng. Computer Engineering | 400 Level | **CGPA: 4.81/5.00** | Expected Graduation: July 2027

TECHNICAL SKILLS

- **Programming:** Python, JavaScript
- **AI/ML:** Machine Learning, Deep Learning, Computer Vision, NLP, Generative AI, Agentic AI, RAG, Prompt Engineering, Transfer Learning
- **Frameworks:** TensorFlow, Keras, Scikit-learn, LangChain, LangGraph, OpenAI Agents SDK, FastAPI, Streamlit
- **Data/Infrastructure:** NumPy, Pandas, OpenCV, ChromaDB, PostgreSQL, Nutanix HCI, Active Directory
- **Tools/Cloud:** Git, GitHub, Docker, AWS, VS Code, Jupyter Notebook, Google Colab

EXPERIENCE

Xpress Payment Solutions — System Administrator Intern | March 2026 – Present

- Support configuration, maintenance, monitoring, and troubleshooting of enterprise IT infrastructure and physical servers.
- Assist with Nutanix HCI, Active Directory administration, system setup, and user management.
- Provide IT support for hardware, software, networking, and infrastructure incidents; participate in troubleshooting and incident resolution.

SELECTED AI/ML PROJECTS

NovaPay AI Assistant — *OpenAI Agents SDK, OpenRouter, Streamlit, Docker*

- Built an agentic customer-support assistant for a fictional fintech company as part of an AI bootcamp.
- Implemented LLM-powered conversation and grounded responses in company documentation.
- Containerized and deployed to Hugging Face Spaces.

GitHub: github.com/AdebankeDev/Novapay-Agent | Live: huggingface.co/spaces/AdebankeDev/Novapay-Agent

InfraPilot AI — *LangGraph, LangChain, RAG, FastAPI, ChromaDB, PostgreSQL*

- Built an AI infrastructure copilot using a tool-calling agent and RAG over enterprise documentation.
- Implemented document processing, embeddings, vector search, multi-turn conversations, authentication, and incident-report generation.

GitHub: github.com/AdebankeDev

Research-to-Report Agent — *Agentic AI, LLMs, Research Automation*

- Built an agentic system that automates research and generates structured reports.
- Applied LLM-based reasoning and task orchestration to automate a multi-step research workflow.

GitHub: github.com/AdebankeDev

Telco Customer Churn Prediction — *Python, Scikit-learn, XGBoost, SHAP, Streamlit*

- Built an end-to-end churn prediction pipeline achieving approximately 0.847 ROC-AUC.
- Implemented SHAP explainability and deployed an interactive Streamlit application for single and batch predictions.

GitHub: github.com/AdebankeDev/Telco-Churn-Predictor

Maize Disease Classification — *TensorFlow, Keras, EfficientNetB0, Computer Vision*

- Built a CNN-based classifier for maize leaf disease detection.
- Improved accuracy from 82.8% with a baseline Dense Neural Network to 91.7% using EfficientNetB0 transfer learning.
- Deployed to Streamlit Cloud for real-time inference.

GitHub: github.com/AdebankeDev/maize-disease-detector

LEADERSHIP & PROFESSIONAL DEVELOPMENT

- **GDG On Campus, FUOYE** — **AI & Machine Learning Lead:** Support AI/ML learning and technical knowledge sharing.
- **AWS AI & ML Scholars** — **Future AWS Agent Engineer Nanodegree:** Ongoing training in LLM reasoning, agentic systems, Amazon Bedrock, and agent development.
- **SWIS EmpowerHer:** Selected participant in STEM mentorship and professional development.
- **WITESA 5.0:** Panelist in a technology and women-in-STEM discussion.

CERTIFICATIONS & ACHIEVEMENTS

- Machine Learning Specialization — DeepLearning.AI / Coursera
- TechCrush AI/ML Bootcamp — Completed
- ALX AI Career Essentials (AICE) — Graduate
- IBM Cybersecurity Professional Certificate — Completed
